

## **AMENDMENTS TO THE CLAIMS**

The following listing of claims will replace all prior versions and listings of claims in the application.

### **LISTING OF CLAIMS**

1. (Currently Amended) An electro-optical device, comprising:  
a pair of substrates;  
an electro-optical material held between the pair of substrates by a sealant; and  
a resin layer provided on at least one substrate of the pair of substrates in both a display region and a peripheral region outboard of the display region, the resin layer including tapers with a larger inclination in the display region than in the peripheral region; and  
an electrode wiring formed between the electro-optical material and the resin layer at both the display region and the peripheral region.  
~~wherein tapers of the resin layer have a plurality of different angles.~~
2. (Canceled)
3. (Currently Amended) The electro-optical device according to Claim ~~[[2]]~~ 1,  
wherein the display region comprises a transmissive display region and a reflective display region, and  
wherein the taper formed in the display region is formed at a boundary between the transmissive display region and the reflective display region.
4. (Canceled)

5. (Currently Amended) The electro-optical device according to Claim ~~[[2]]~~ 1,  
wherein the taper of the display region has a first angle with a base to  
height ratio from 4:1 to 2:1, and

wherein the taper in the peripheral region of the display region has a  
second angle with a base to height ratio from 8:1 to 4:1.

6.-9. (Cancelled)

10. (Currently Amended) ~~A substrate for an~~ An electro-optical device,  
comprising:

a substrate; ~~and~~

a resin layer provided on the substrate~~[[,]]~~; and

an electrode that continuously extends across the resin layer;

wherein tapers of the resin layer have a plurality of different angles.

11. (Original) An electronic apparatus comprising the electro-optical device  
according to Claim 1.

12.-15. (Cancelled)
